The funding is attached to an estimated \$ 27.1 billion transportation bill that goes next to the Senate and carries with it a proposed permanent smoking ban on virtually all U.S. domestic airline flights.

[illegible]

Figure 1 illustrates a dependency parse tree for the sentence: "And after losing a battle Tuesday night with the Senate Foreign Relations Committee, appropriators from both houses are expected to be forced back to conference." The diagram shows hierarchical groupings of words into phrases and identifies grammatical relations. Key groupings include "after losing a battle Tuesday night" (marked with prep, verb, noun, and conj), "Senate Foreign Relations Committee" (marked with noun, prep, and conj), and "appropriators from both houses" (marked with noun, prep, and conj). The main clause "are expected to be forced back to conference" is also shown with its respective grammatical relations (verb, prep, noun, and conj).
