

[20582001]

Figure 10. A parse tree for the sentence in Figure 9. The tree is annotated with the word classes of the words and the grammatical relations (GRs) between the words. The GRs are labeled with the name of the relation and the number of the relation. The word classes are labeled with the name of the class and the number of the class. The tree is a partial parse tree, showing only the parts of the tree that are relevant to the analysis of the sentence.

[illegible]

Accrued interest on the refund of v_{ide}-p-i was about 5 18 million cardi-i-c as p_{re}-u-i p_{re}-u-i Oct. 25 dom₂-x-c

The refund stems from a court ruling that found certain payments by Humana subsidiaries to its insurance subsidiary during fiscal 1977 through 1979 deductible as premiums for liability insurance.
