Longtime Hollywood associates describe Mr. Guber as intellectual powerhouse of pxe-xi the two ci-q-i-h-h man with a flair for deal-making and marketing.  
a-e-u n-a-m-e-d-x-i n-o-f-x-i v-to-v-e-i-p-i-n x-n-x n-x n-x n-x p-e-e-u i-h-h n-x n-x p-e-x-i q-i-h-h n-x n-x q-i-h-h n-x p-e-u i-h-h n-x p-e-u i-h-h n-x v-e-i-p-u - v-e-i-p-u

Figure 1: A diagram illustrating the structure of the proposed model. The diagram shows two sentences being processed by a neural network. The first sentence is "Peter is a major piece of Hollywood manpower who has really earned his success". The second sentence is "Robert Bookman, an agent at Creative Artists Agency, is a very successful actor". The diagram shows the input tokens, the hidden states, and the output tokens. The model is designed to process the input tokens and generate the output tokens. The diagram illustrates the flow of information from the input tokens to the hidden states and then to the output tokens. The model is designed to process the input tokens and generate the output tokens. The diagram illustrates the flow of information from the input tokens to the hidden states and then to the output tokens. The model is designed to process the input tokens and generate the output tokens.

Figure 10: A parse tree for the sentence "Mark Johnson, the producer of 'Rainman', chimes in: 'He pronounces his great ability to hire terrific people and delegate authority ...'"

[illegible][illegible]

Figure 10: A parse tree for the sentence "He gets better reviews as a creative whiz, an enthusiast, an idea man." The tree structure is as follows:

- Root node: **comp**
  - Left child: **ARG1** (He)
  - Right child: **get** (gets)
    - Left child: **ARG2** (a)
    - Right child: **ARG1** (better)
      - Left child: **ARG2** (reviews)
      - Right child: **as** (as)
- Left child: **a** (a)
  - Left child: **ARG1** (creative)
  - Right child: **whiz** (whiz)
- Left child: **an** (an)
  - Left child: **ARG1** (enthusiast)
  - Right child: **an** (an)
    - Left child: **ARG1** (idea)
    - Right child: **man** (man)

Barbra      Streisand      made      him      famous  
named:x-c    named:x-c    v\_cause:e-i-h    pron:x    a\_for:e-p-i

Figure 1 illustrates a syntactic tree for the sentence "He cut her hair." The root node is "top", which branches into "ARG1" and "ARG2". "ARG1" branches into "He" (pron:x) and "cut" (v:e-i-p). "ARG2" branches into "her" (q:i-h-h) and "hair" (n:x). A "poss" node is shown as a modifier of "hair".

He lived with her .  
pron:x v:e-i p:e-u-i pron:x \_

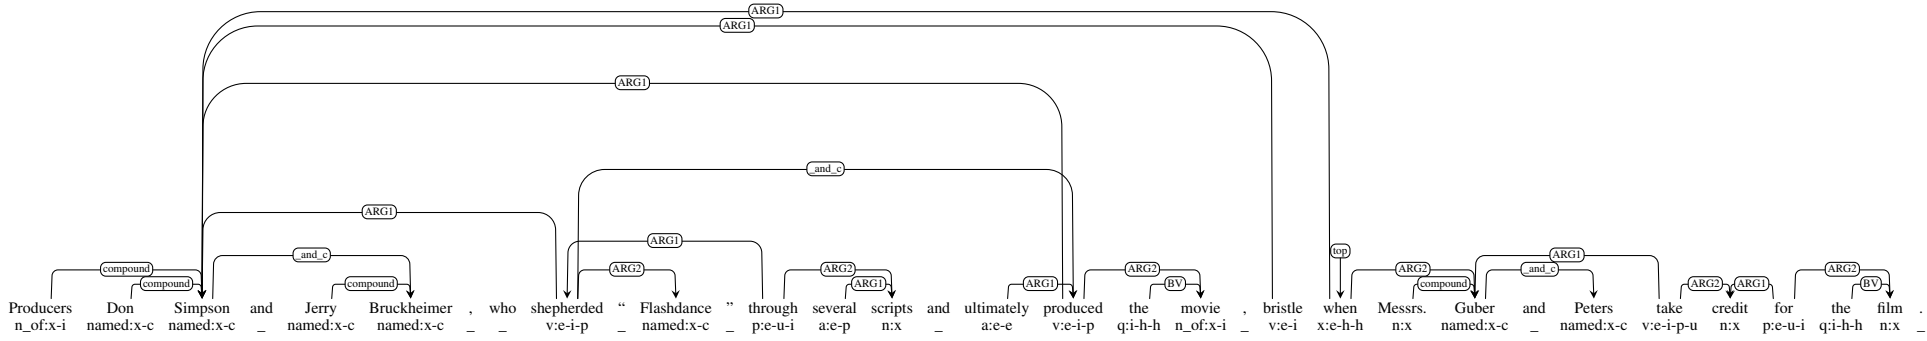

[illegible]

Figure 1. A tree diagram of the sentence in (1) illustrating the hierarchical structure of the sentence. The tree is a binary branching structure. The root node is a circle containing the word 'and'. It branches into two main parts. The left part is a circle containing the word 'compounds', which branches into 'Mr. Nuber' and 'by contrast'. The right part is a circle containing the word 'that', which branches into 'has been married' and 'for more than 20 years'. The word 'has been' is further broken down into 'has' and 'been'. The word 'married' is further broken down into 'mar' and 'ried'. The word 'for' is further broken down into 'for' and 'one'. The word 'more' is further broken down into 'more' and 'many'. The word 'than' is further broken down into 'than' and 'card-i-c'. The word 'years' is further broken down into 'years' and 'n:x'. The word 'n:x' is further broken down into 'n' and 'x'.

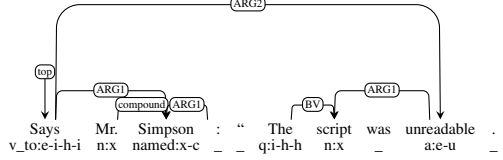

Figure 1 illustrates the syntactic structure of the sentence "Peter named a very bright, sympathetic guy when you're doing a deal, a very nice card, one agent." The diagram shows the hierarchical organization of the sentence, with nodes labeled with syntactic categories and their corresponding words. The root node is S, which branches into NP (Peter) and VP. VP branches into V (named) and VP. The second VP branches into NP (a very bright, sympathetic guy) and VP. The third VP branches into S (when you're doing a deal) and VP. The fourth VP branches into NP (a very nice card) and VP. The fifth VP branches into NP (one agent). The words are: Peter, named, a, very, bright, sympathetic, guy, when, you, 're, doing, a, deal, a, very, nice, card, one, agent.

[illegible]

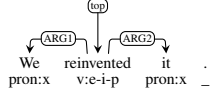

Figure 10. A syntax tree for the sentence in (9). The tree is annotated with the syntactic category of each node and the syntactic category of the terminal node it dominates. The tree is annotated with the syntactic category of each node and the syntactic category of the terminal node it dominates. The tree is annotated with the syntactic category of each node and the syntactic category of the terminal node it dominates.

[21634099]

In July a year later , Warner agreed to release the producers from their old contract when Messrs. Guber , Peters and Sugarman made a \$ 100 million offer to buy 25 % of MGM/UA .

[21634101]

But the MGM plan collapsed just two weeks later .

[21634102]

Mr. Guber and Mr. Peters say they got a look at the books and balked at the price .

[21634103]

Their relationship with Mr. Sugarman soured shortly thereafter .

[21634104]

Last May , he sold his 24 % stake in Barris to a passive Australian investor and Barris was renamed Guber Peters Entertainment Co .

[21634105]

Meanwhile , Mr. Guber and Mr. Peters had agreed to extend their Warner agreement with the new five-year exclusive contract .

[21634106]

The new deal was considered the most generous of its kind , both financially and in terms of creative freedom .

[21634108]

The producers ' 28 % share of publicly held Guber Peters would net them an additional \$ 50 million .

[21634109]

Sony also agreed to indemnify the producers against any liability to Warner .

[21634110]

Sony is paying a hefty price for a company that had revenue of only \$ 42 million last year .

[21634111]

And earnings have been erratic .

[21634113]

Guber Peters stock , which traded as low as \$ 6 a share last year , closed yesterday at \$ 16.625 .

[21634114]

The two sides now are accusing each other of lying .

[21634115]

Mr. Guber and Mr. Peters claim they have an oral agreement with Warner executives that allows them to terminate their contract should the opportunity to run a major studio arise .

[21634116]
