Figure 10: A syntax tree for the sentence "In March, Mr. Laff was indicted on 15 counts of conspiracy, mail and securities fraud, and obstructing an investigation by the Securities and Exchange Commission." The tree shows the hierarchical structure of the sentence, with nodes labeled with syntactic categories and their corresponding words or phrases. The root node is S, which branches into WHEN and MAIN. WHEN branches into IN and MARCH. MAIN branches into MR. LAFF, WAS, INDICTED, ON, 15, COUNTS, OF, CONSPIRACY, MAIL, AND, SECURITIES, FRAUD, AND, OBSTRUCTING, AN, INVESTIGATION, BY, THE, SECURITIES, AND, EXCHANGE, COMMISSION. The tree also shows the hierarchical structure of the noun phrase "mail and securities fraud" and the prepositional phrase "by the Securities and Exchange Commission".

[illegible]

[21065027]

Figure 1 is a dependency network diagram illustrating the relationships between entities and their mentions in a legal document. The diagram uses nodes (circles) to represent entities and directed edges (arrows) to represent dependencies between mentions of these entities. The entities are: Mr. Lorin, a stock promoter, pleaded guilty to the stock-manipulation charges in April and joined ev-w7232, to cooperate ev-w705f1 with the government's investigation of Mr. Laff, and Mr. Laff. The mentions are: Mr. Lorin, a stock promoter, pleaded guilty to the stock-manipulation charges in April and joined ev-w7232, to cooperate ev-w705f1 with the government's investigation of Mr. Laff, and Mr. Laff. The diagram shows how these mentions are connected by dependencies, such as 'MCT-arg' (Mention Context Type - argument) and 'MCT-arg' (Mention Context Type - argument).

[21065028]

During his cross examination of Mr. Lang read from the transcripts of a conversation that was taped on October 20, 1988

[21065029]

Figure 1 illustrates a dependency parse tree for the sentence: "Stanley Aslanian, the Haas broker who agreed to carry a hidden microphone during the conversation, also has pleaded guilty to conspiracy to commit securities violations in the stock manipulation and agreed to cooperate". The tree shows hierarchical groupings of words into phrases, with arrows indicating the flow of dependencies between these groups and the main sentence structure. Key phrases identified include "NP" (Stanley Aslanian), "PPS member" (the Haas broker), "ATP" (who agreed), "ESTB" (to carry), "MCT-arg" (a hidden microphone), "PAT-arg" (during the conversation), "CPHSE-arg" (also has pleaded guilty), "CONJ member" (to conspiracy), "LOC" (to commit securities violations), "ESTB" (in the stock manipulation), "CONJ member" (and agreed), and "PP" (to cooperate). The diagram demonstrates how these phrases are nested and related within the overall sentence structure.

[21065030]

According to the transcript, Mr. Lorin said ev-w2833f1 Mr. Laff should be killed after Mr. Aslanian told ev-w3348f3 him that information given to Laff by another conspirator could jeopardize ev-w1769f1 the stock scheme.

[21065031]

Mr. Lorin then repeated the threat and Aslanian urged him not to say such things.

[21065032]

Figure 1 shows two dependency parse trees. The left tree is for the sentence: "From the parts of the transcript read by Mr. Lang, it was unclear exactly Mr. Lorin feared w-1293f1 might happen ev-w1548f9". The right tree is for the sentence: "From the parts of the transcript read by Mr. Lang, it was unclear exactly Mr. Lorin feared w-1293f1 might happen ev-w1548f9". Both trees show hierarchical structures with nodes like APP, EXIST, ACT-up, ESTD, and others, connected by arrows indicating dependencies.

[21065033]

When asked for a copy of the transcript, Mr. Lang said Judge Thomas P. Griesa had instructed him not to release it or the memorandum.

[21065036]

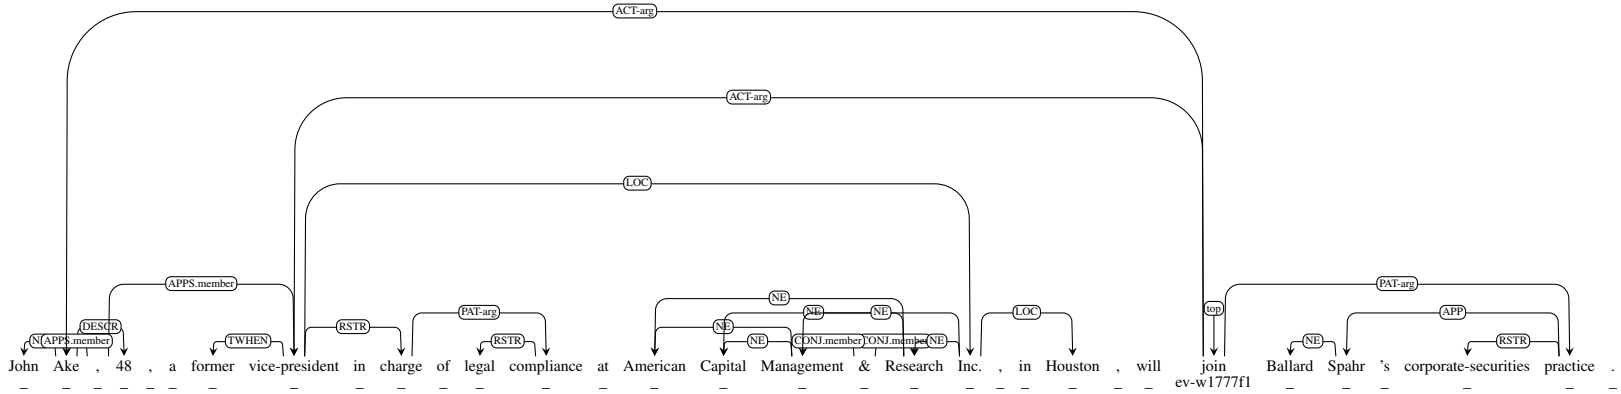

Mr. Lorin responded, "No."

[21065037]

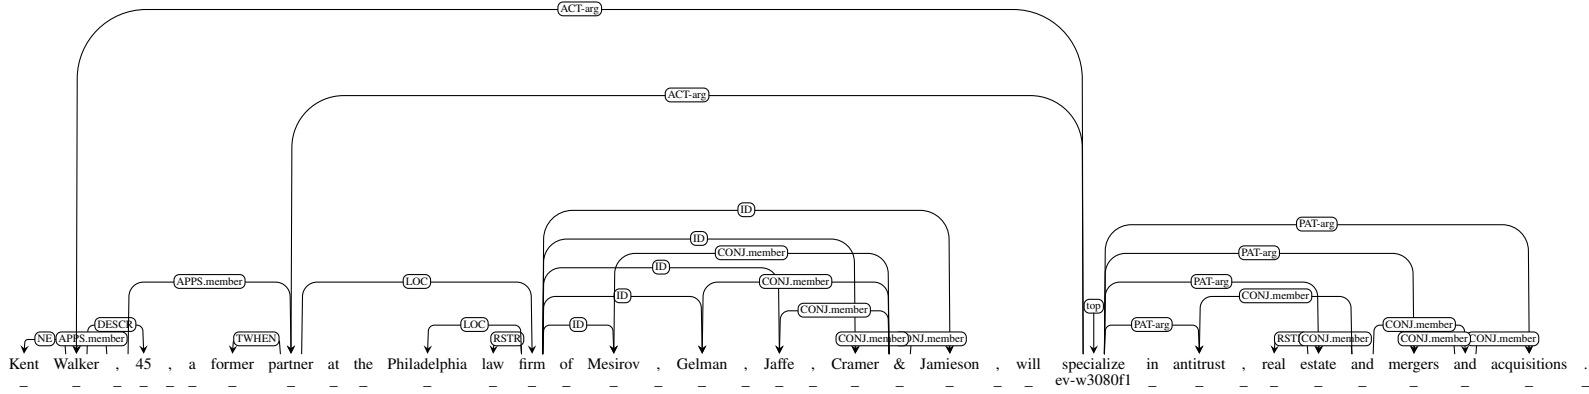

When Mr. Lang asked Mr. Lorin whether he had taken steps to have Mr. Laff killed the witness again said no.
