

[21531001]

Also late last week, UAL flight attendants agreed to participate with the pilots in crafting a revised offer.

But the machinists union, whose opposition helped scuttle the first buy-out bid, is likely to favor a recapitalization with a friendly third-party investor.

[illegible]

Figure 1: A complex dependency network diagram showing the relationships between various entities and actions. The diagram is organized into three main sections. The left section shows a sequence of events: 'Speculation' (ACT-arg), 'has' (cp), 'also' (RHEAD), 'arisen' (ev-w132f1), 'that' (the), 'the' (UAL), 'executive' (APF), 'most' (ESTB), 'closely' (ALAND), 'identified' (ev-w1639f1), 'with' (the), 'failure' (EFT-arg), 'to' (the), 'gain' (PMT-arg), 'bank' (PMT-arg), and 'financing' (ACT-arg). The middle section shows a sequence of roles: 'chief' (ESTB), 'financial officer' (ESTB), 'John' (ESTB), 'Pope' (SUB), 'may' (ACT-arg), 'come' (ev-w590f28_u_nobody), 'under' (CPHR-arg), 'pressure' (the), 'to' (the), and 'resign' (PMT-arg). The right section shows a sequence of roles: 'chief' (ESTB), 'financial officer' (ESTB), 'John' (ESTB), 'Pope' (SUB), 'may' (ACT-arg), 'come' (ev-w590f28_u_nobody), 'under' (CPHR-arg), 'pressure' (the), 'to' (the), and 'resign' (PMT-arg). The diagram is a complex dependency network with many arrows indicating the relationships between these entities and actions.

Figure 10: The parse tree for the sentence "However, people familiar with the buy-out group said ev-2833f1 Mr. Pope's departure would weaken the airline's management at a critical time." The tree shows the hierarchical structure of the sentence, with nodes labeled with grammatical functions such as *MC-arg*, *UT-arg*, *PV-arg*, *ESTR*, and *ESTR*. The sentence is segmented into tokens: However, people familiar with the buy-out group said ev-2833f1 Mr. Pope's departure would weaken the airline's management at a critical time.
