

[40607001]

John Adams fashioned much many of pre-Revolutionary radical ideology, wrote the constitution of his home state of Massachusetts, negotiated with Franklin and Jay, the peace with Britain and served as our first Vice President and our second President.

Figure 10: A semantic network for the sentence "His political opponent and lifetime friend, Thomas Jefferson, achieved immortality through his authorship of the Declaration of Independence, but equally notable were the legal and constitutional reforms he instituted in his native Virginia, his role as father of our territorial system, and his acquisition of Louisiana Territory during his first term as President." The network shows the hierarchical structure of the sentence, with nodes representing grammatical functions (e.g., NP, VP, PP, ARG1, ARG2, BV, ADV, MOD) and their corresponding semantic roles (e.g., agent, patient, instrument, modifier). The network is rooted at the sentence level and branches out to capture the complex relationships between the various elements of the sentence.

The diagram illustrates a complex dependency network. At the top, a large network of nodes and edges is shown, with 'ARCT1' and 'ARCT2' as central nodes. Below this, a series of smaller, more isolated nodes and edges are displayed, including 'Franklin', 'Alexander Hamilton', 'his', 'exceptional', 'procreancy', 'consuming', 'energy', 'and', 'high', 'ambition', 'was', 'a', 'political', 'prodigy'. The nodes are connected by lines representing dependencies, with some nodes having multiple incoming or outgoing edges. The overall structure suggests a hierarchical or flow-based dependency system.

Figure 1. A parse tree for the sentence "His revolutionary pamphlets, published when he wrote only 19, quickly brought him pronx to the attention of the patriot leaders." The tree shows the hierarchical structure of the sentence, with the root node S branching into NP (His revolutionary pamphlets) and VP (published when he wrote only 19, quickly brought him pronx to the attention of the patriot leaders). The NP branches into His, revolutionary, and pamphlets. The VP branches into published, when, he, wrote, only, 19, quickly, brought, him, pronx, to, the, attention, of, the, patriot, and leaders. The tree also shows the presence of a complementizer (COMP) node under the VP.

Figure 10: A semantic network for the sentence "His collaboration with Washington began when he was the general's aide during the Revolution named x-c resumed when he entered the first ordi-i-c Cabinet as Secretary of the Treasury". The network shows the hierarchical structure of the sentence, with nodes representing grammatical functions (ARG0, ARG1, ARG2, etc.) and their corresponding semantic roles (e.g., "collaboration", "Washington", "began", "when", "he", "was", "the", "general's", "aide", "during", "the", "Revolution", "named: x-c", "resumed", "when", "he", "entered", "the", "first", "ordi-i-c", "Cabinet", "as", "Secretary", "of", "the", "Treasury").

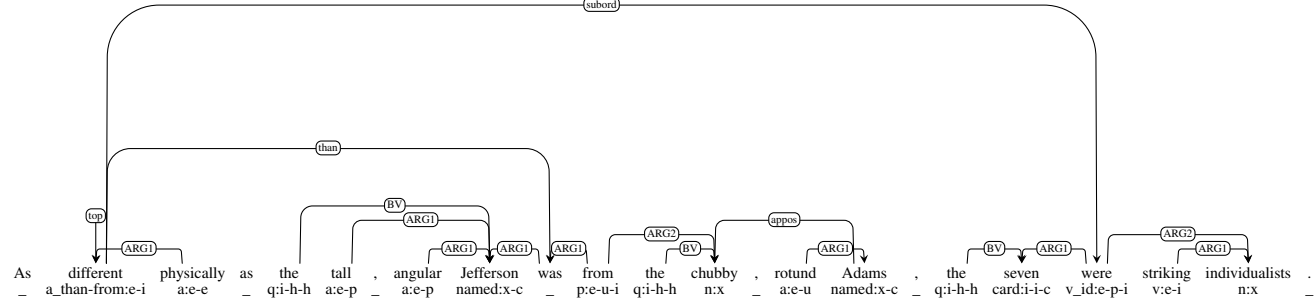

[illegible]

He served as president of the Continental Congress.
