Figure 10: A syntax tree for the sentence "If a very valuable weapon in their army, which could enable Ford to bid sooner for Jaguar, observed Mr Barber of James Cupel." The tree shows the hierarchical structure of the sentence, with nodes labeled with parts of speech (e.g., ACT, EXT, EFT, ETR, ETC, ETT, ETE, ETO, ETT, ETE, ETO) and their corresponding words or phrases. The tree is rooted at the top with the word "If". The main clause is "observed Mr Barber of James Cupel". The subordinate clause is "which could enable Ford to bid sooner for Jaguar". The tree also includes a prepositional phrase "in their army" and a relative clause "which could enable Ford to bid sooner for Jaguar".

Figure 6 illustrates the syntactic structure of the sentence "Otherwise, Jaguar may have to tolerate the two U.S. auto giants each owning a 15% stake for more than a year." The diagram shows a hierarchical tree structure starting from the root node  $\bar{S}$ . The root node branches into  $\text{PRET}$  (Otherwise, .) and  $S'$ . The  $S'$  node branches into Jaguar, may, have, to, and  $V\bar{P}$ . The  $V\bar{P}$  node branches into tolerate and another  $S'$ . This second  $S'$  branches into the, two, U.S., auto, giants, each, and another  $V\bar{P}$ . This third  $V\bar{P}$  branches into own and a fourth  $S'$ . The fourth  $S'$  branches into a, 15%, and stake. Finally, the fifth  $S'$  branches into for, more, than, a, year, and .

" It would be difficult to see how a car company can be owned by a collective . " Sir John said
