ev-w20 [21373005] But Ramtron of Colorado Springs , Colo. , plans to start shipping commercial quantities of ev-w2928f1 ev-w2928f2 computer memory equipment , including floppy-disk and hard-disk drives √RSTR) ↓ ferroelectric technology from Krysalis Corp. in Albuquerque , N.M . National says it agreed to acquire Krysalis 's assets and will start shipping commercial quantities of its first chips , including a 4-kilobit memory , next year . production hurdles are overcome , the chips could take over a significant part of the market . Military buyers have shown interest , National says , because ferroelectric chips resist atomic radiation .
